25X1

SUPPLEMENT TO  
REPORT NO.

THIS IS UNEVALUATED INFORMATION

1. There has been a steady flow of ship traffic in the port of Rostock for the past two weeks. Large quantities of reparations goods have arrived for loading. Small Soviet freighters, down to 1,000 tons, arrive with case goods, and load cement, scrap metal, steel building material, and rolls of cable. Cases were also loaded having inscriptions indicating that they came from the Zeiss works at Jena. Bleichert cranes and mine locomotives were also loaded. The incoming goods, presumably arms and ammunition, are immediately loaded into freight cars under Soviet guards. The trains nowadays consist almost entirely of closed cars. Some small cases marked with black crosses have also been unloaded and transported in trucks toward Primerwald. For the past two weeks a 12-car freight shuttle service has been maintained between Rostock and Primerwald. A Finnish ship loaded rolls of cable and handling cranes.

25X1 visited Rostock daily. [redacted] The armament of the minelayer as far as observed consisted of guns (120 to 150 mm) one forward, midships and aft; two 75 mm antiaircraft guns, and two machine guns aft. This ship was about 1,500 tons.

25X1 3. [ ] fishers have been arriving almost daily at the Warnemünde fish harbor. They bring mostly small catches of herring and cod. They receive in exchange Western money, but mainly nets and boat equipment. The presence of these Western fishers is exploited for propaganda purposes. All sorts of promises are made to induce them to make statements, which are then published all around in the East Zone newspapers.

4. At Stralsund, fishing vessels must display on each side of the bow a distinguishing number, on a 50 x 50 cm white ground. Sailing vessels must report in advance to the Seepolizei on each trip to sea. They may not go more than 16 kilometers from Rügen; if they go beyond this limit they will be fired upon by the Seepolizei without warning.
